Figure showing growth of Shakti

OUR HISTORY

The pioneers of Shakti school are two real Brothers, Brijesh Mehta & Sudeep Mehta. Both of them started teaching their respective subjects Chemistry & Physics in 1999. The name given to the institute was 'Shakti Classes'.

The students were from ICSE Board.

The first premise was purchased in 2003. In 2006, the premise was shifted to where it is today with a new name of 'Shakti Education'.

In 2007 it got converted into a Gujarat Board English medium school. The sole aim of the school was to prepare state board students for national level competitive exams. Initially the school struggled to get students due to lack of awareness among the students & parents regarding competitive exams. But with the growing awareness the strength in the school increased.

Today we stop admissions in one day after the announcement of the results. 'Shakti' started preparing students for competitive exams from 2006. More than 3000 students have studied in the institute so far. Students of 'Shakti' are everywhere in India and abroad.

They are in the most reputed institutes of India like in IITs at Bombay, Chennai, Kanpur, BITS Pilani, Goa, Hyderabad & Dubai, VIT Vellore & Chennai, IISc Pune and many more... Best faculties of Rajkot strive to work at Shakti school.

OUR VISION

The institute works with a definite vision. It is to provide the best education to English/Gujarati Medium students of Rajkot so that they can compete with other students of India while appearing for all National level competitive exams.

We also have a social vision. No students should be deprived of quality education due to lack of finances.

Students of Shakti school should be the pillars of India's growth in coming years.

SYSTEM OF SHAKTI SCHOOL

Shakti school works with a system in place. We prepare students for competitive exams keeping in mind that they should also be fundamentally strong.

It's a unique blend of Boards + Competitive exam preparation. Cramming without understanding is nowhere in our system. The students are given worksheets based on a topic which make their understanding even better.

Regular test taking and evaluation helps in the development of the students. Test marks are regularly sent to the parents to keep them updated about their Kid's progress. All the teachers are best in Saurashtra in their respective subjects.

They all work in a committed way for the growth and progress of all the students. The students are divided as per their caliber and grasping ability so that there are like minded students in a class capable of studying at almost same pace.

Such a division helps us in teaching them as per 'their' requirement. The school has set & maintains a high standard of discipline for all.

Why SHAKTI SCHOOL for 9th / 10th ??

'AS YOU SOW, SO YOU REAP.'

It is said most befittingly that the minds of children are like a lump of clay. Whatever falls on them, leaves an impression.

It is with this end in view that we at SHAKTI SCHOOL have started Standard 9th & 10th. These two years are very very significant for any child, when it comes to choice of streams or career, going forward. It is advised that parents are extra-careful about their choice of institutes where they decide to send their children, during these two crucial years. Needless to point out that the teachers who mentor them at this stage should be the best role models they (students) can emulate in moulding their life's journey.

We at SHAKTI SCHOOL have taken great care in allocating educators for our students in Standard 9th & 10th. It is worth mentioning that teachers who teach PHYSICS, CHEMISTRY, MATHS, BIOLOGY in HIGHER SECONDARY Sections, have been assigned responsibilities to educate our secondary section students. No prize for guessing how a learner can benefit from this method of imparting education.

We run a course of teaching which can be best summarized as BOARD'S + FOUNDATION for next level (H.S.). We help lay the foundation of Higher Studies through Conceptualization, Assimilation and Imagination. Extra study materials are provided, which are way above and beyond the concerned Board's prescribed syllabus. As a result, our students require no other help or guidance from outside. Study materials are customized and designed specifically, keeping in mind the need of the students for intensive and extensive studies for the ever-changing and highly competitive academic fields. Special care and attention is given in MATHS and SCIENCE to ensure that really meritorious and ambitious students do not remain stuck within the textbook chapters and concepts.
